Introduction

Index Objective

The VettaFi Thematic Rotation Quality Momentum Index is composed of VettaFi's top themes. The top themes, as measured by momentum and quality, are selected quarterly from VettaFi's theme universe are equal weighted to form the index.

Highlights

The top selected VettaFi themes are equally weighted to form a thematic portfolio composed of the current highest rated themes.

Dates

Reference Dates: Last Business Date of month prior to Rebalance/Reconstitution Month.

Reconstitution Dates: Indexes reconstituted quarterly on the third Friday of the last month of each calendar quarter.

Weight Date: Thursday prior to second Friday of Rebalance/Reconstitution Month.

Rebalance Dates: Indexes are rebalanced quarterly on the third Friday of the last month of each calendar quarter.

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein.

The list of the main supplemental documents for this methodology can be found in the Methodologies and Governance tabs on the [Index Resources](#) page as follows:

| Supporting Documents |

| Index Maintenance Policy |
| Index Governance |
| Index Policies |
| Methodology Policies |
| Glossary |
| Index Change and Consultation Policy |

Eligibility Criteria and Index Construction

Universe

Constituents of portfolios that represent themes in VettaFi's theme universe. The Universe is composed of themes that are VettaFi index or sub-index themes. The Index Committee is responsible for making decisions on theme inclusion when there are questions regarding representation or eligibility.

Index Construction

Constituent Selection

- Each theme receives a composite score, equally weighted between Momentum (40%) and Quality (60%) components. (see below). Themes are ranked by composite score, and selected in descending order until at least 7 themes and 125 companies are represented. When two themes have common ICE sub-industries overlap by 40%, only the theme with the highest score is kept.

Momentum Score (40%)

| Factor | Category | Metric |
|----------|-------------------|---|
| Momentum | Price Momentum | 1-Year Risk-Adjusted, Time-Weighted Price Momentum |
| Momentum | Earnings Momentum | 3-Month EPS Revisions (Next Twelve Months Average - NTMA) |

Quality Score (60%)

| Factor | Category | Metric |
|---------|---------------|---|
| Quality | Profitability | Return on Equity (1-Year Current and 1-Year Forward Looking) |
| Quality | Solvency | Debt Coverage Ratio (1-Year Current and 1-Year Forward Looking) |
| Quality | Solvency | Interest Coverage Ratio (1-Year Current) |

Constituent Weightings & Constraints

Each selected theme is equally weighted. Within themes, companies are weighted proportionally to their weight in the underlying theme. If a company appears in multiple themes, its weight is the sum of its individual weights across those themes. A single-stock weight cap of 8% is applied, with any excess redistributed back to the corresponding themes on a pro-rata basis.

Index Maintenance

Rebalancing and Reconstitution

The Indexes are rebalanced on the “Rebalance Date” and additionally reconstituted on the “Reconstitution Date”. Pricing used in share weights used for reconstitutions are as of the “Weight Date”. Share weights for the rebalanced Indexes are computed as of the “Weight Date”. Changes to the Indexes related to the rebalances are as of the “Rebalance Date”. Additions are only made on reconstitution dates.

Corporate Actions

Please refer to the Index Maintenance Policy document for information on Corporate Action processing.

Index Information

Index history availability, base dates and base values are shown in the table below.

| Index | Price Index | Base Date | Base Value | Total Return Index | Base Date | Base Value |
