The ROBO Global Robotics and Automation Index Series' objective is to provide investors with comprehensive, transparent and diversified benchmarks representing the global value chain of robotics, automation and enabling technologies.

The Case for ROBO

- INDUSTRY EXPERTS** specializing in robotics, artificial intelligence (AI), and healthcare technologies whose mission is to define and identify the universe of robotics and automation for investors
- GLOBAL EXPOSURE** to the value chain of robotics, automation, and AI companies, across developed and emerging markets.
- MULTI-CAP** index providing diversified access to large-, mid- and small-cap companies with minimal overlap with most broad market indices.

ROBO Global Industry Classification

To date, we have identified 11 subsectors of suitable product and technology maturity to the robotics and automation theme. These subsectors carry high growth and earnings potential. On a regular basis, we screen our database to identify companies that fit into these subsectors, meet a minimum revenue threshold, and satisfy our ESG Policy. Each company is assigned a "Theme Score" based on the company's level of revenues, market and technology leadership, and investments. These scores range from 1-100 with 100 representing significant levels of revenues and leadership. A company must have a minimum Theme Score of 50 to be considered for inclusion in the index.
